The Faculty of Education

The origins of the present Faculty of Education date from an agreement in 1955 between the University and the Province, establishing a review for the higher education of primary school teachers. Local conditions and the availability of qualified personnel were such that this agreement was not reached until 1960. The initial board of the Faculty of Education was named "Faculty Council" and was composed of representatives from the University and the Province.

The Faculty was named "Faculty of Education and Teacher Training" in 1962, and in 1964 it was renamed "Faculty of Education".

Duncan McArthur Hall

The Faculty of Education is housed in Duncan McArthur Hall, a building constructed in 1962. The hall is named after Duncan McArthur, a prominent educator and administrator who served as the first dean of the Faculty of Education.

Administrative Staff

- John H.? (abbreviation unclear)
- Mrs. J. H., Assistant to the Dean

Library

The library is housed in the same building as the Faculty of Education. It is open to the public.

History of the University

The University was founded in 1851 and has since grown to become one of the largest universities in the world. The campus is located on a beautiful riverside setting, providing a stunning backdrop for the academic community.

The University has a strong commitment to research and innovation, with numerous centers and institutes dedicated to advancing knowledge in a variety of fields.

In conclusion, the University is a proud institution with a rich history and a bright future.

Course of Study

46.001.01 8th Grade Literature

The course of study in literature for 8th-grade students at the school shall be that which is prescribed by the Board of Education, and shall consist of the study of English literature, including the study of the English language, the history of literature, and the principles of literary criticism. The course shall be divided into two parts: the first part shall be devoted to the study of English literature, and the second part shall be devoted to the study of foreign literature.

46.001.02 8th Grade Science

The course of study in science for 8th-grade students at the school shall be that which is prescribed by the Board of Education, and shall consist of the study of the natural sciences, including the study of the physical sciences, the biological sciences, and the earth sciences. The course shall be divided into two parts: the first part shall be devoted to the study of the physical sciences, and the second part shall be devoted to the study of the biological sciences.

46.001.03 8th Grade Social Studies

The course of study in social studies for 8th-grade students at the school shall be that which is prescribed by the Board of Education, and shall consist of the study of the social sciences, including the study of the political sciences, the economic sciences, and the cultural sciences. The course shall be divided into two parts: the first part shall be devoted to the study of the political sciences, and the second part shall be devoted to the study of the economic sciences.
The context and nature of this document suggest that it is academic in nature, possibly a research paper or a technical report. The text appears to be discussing various aspects of a particular field, with references to studies, experiments, and methodologies. However, without additional context, it is not possible to provide a more detailed analysis or translation of the content.
normal, the emphasis will be on children who fail in the intermediate grades.

Counselors will also examine certain counseling theories—assertion, behavior modification, and Gestaltian approaches—and will discuss the advantages and disadvantages of various counseling techniques.

20.02.01 Special Education, Part I

This course will explore various techniques used to improve educational outcomes for students with special needs. Topics will include strategies for identifying and supporting students with disabilities, inclusive education, and the role of technology in special education.

20.02.07 English as a Second Language, Part I

As a course for those learning English as a second language, this course will focus on developing essential language skills. Topics will include listening, speaking, reading, and writing. Students will also learn about cultural differences and the role of English in the global community.

20.03.01 Reading, Part I

This course will teach students how to become effective readers. It will cover various strategies for improving reading comprehension, including methods for note-taking, summarizing, and critical thinking.

20.03.02 English as a Second Language, Part II

This course will continue the exploration of English as a second language, with a focus on improving listening and speaking skills. Students will also learn about the culture and social contexts of English-speaking communities.

20.03.03 Social Studies, Part I

This course will introduce students to the basic concepts of social studies. Topics will include history, geography, economics, and government. Students will learn how to analyze historical events and understand the impact of social and economic forces on society.

20.04.01 Mathematics, Part I

This course will focus on developing basic mathematical skills and concepts, including arithmetic, algebra, and geometry. Students will learn how to apply these skills to solve real-world problems.

20.04.02 Science, Part I

This course will introduce students to the fundamental principles of science. Topics will include physics, biology, and chemistry. Students will learn how to observe and experiment, and how to interpret scientific data.

20.04.03 Science, Part II

This course will continue the exploration of science, with a focus on more advanced topics in physics, biology, and chemistry. Students will also learn about the impact of scientific discoveries on society and the environment.

20.05.01 Music, Part I

This course will introduce students to the basic elements of music, including melody, harmony, and rhythm. Students will learn how to read and write music notation, and how to perform on various instruments.

20.05.02 Music, Part II

This course will continue the exploration of music, with a focus on more advanced topics such as composition, improvisation, and music theory. Students will also learn about the role of music in culture and society.

20.06.01 Art, Part I

This course will introduce students to the basic principles of art, including composition, color theory, and perspective. Students will also learn about the history and development of various art movements.

20.06.02 Art, Part II

This course will continue the exploration of art, with a focus on more advanced topics such as sculpture, painting, and multimedia. Students will also learn about the role of art in society and culture.

20.07.01 Physical Education, Part I

This course will introduce students to the basic concepts of physical fitness and exercise. Students will learn how to develop healthy habits and maintain a healthy lifestyle through a variety of physical activities.

20.07.02 Physical Education, Part II

This course will continue the exploration of physical education, with a focus on more advanced topics such as weight training, nutrition, and injury prevention. Students will also learn about the importance of physical fitness in overall health and wellness.

20.08.01 Health, Part I

This course will introduce students to the basic concepts of health and wellness. Students will learn about the importance of good nutrition, exercise, and stress management in maintaining a healthy lifestyle.

20.08.02 Health, Part II

This course will continue the exploration of health and wellness, with a focus on more advanced topics such as mental health, substance use, and disease prevention. Students will also learn about the role of health care providers in promoting health and preventing illness.

20.09.01 Career Development

This course will introduce students to the basic concepts of career planning and decision making. Students will learn how to explore different career options, prepare for the job market, and develop job search strategies.

20.09.02 Career Development

This course will continue the exploration of career development, with a focus on more advanced topics such as job interviews, resume writing, and job negotiation. Students will also learn about the role of networking in career advancement.

20.09.03 Career Development

This course will introduce students to the basic concepts of career planning and decision making. Students will learn how to explore different career options, prepare for the job market, and develop job search strategies.

20.09.04 Career Development

This course will continue the exploration of career development, with a focus on more advanced topics such as job interviews, resume writing, and job negotiation. Students will also learn about the role of networking in career advancement.

20.09.05 Career Development

This course will introduce students to the basic concepts of career planning and decision making. Students will learn how to explore different career options, prepare for the job market, and develop job search strategies.

20.09.06 Career Development

This course will continue the exploration of career development, with a focus on more advanced topics such as job interviews, resume writing, and job negotiation. Students will also learn about the role of networking in career advancement.

20.09.07 Career Development

This course will introduce students to the basic concepts of career planning and decision making. Students will learn how to explore different career options, prepare for the job market, and develop job search strategies.

20.09.08 Career Development

This course will continue the exploration of career development, with a focus on more advanced topics such as job interviews, resume writing, and job negotiation. Students will also learn about the role of networking in career advancement.

20.09.09 Career Development

This course will introduce students to the basic concepts of career planning and decision making. Students will learn how to explore different career options, prepare for the job market, and develop job search strategies.

20.09.10 Career Development

This course will continue the exploration of career development, with a focus on more advanced topics such as job interviews, resume writing, and job negotiation. Students will also learn about the role of networking in career advancement.

20.09.11 Career Development

This course will introduce students to the basic concepts of career planning and decision making. Students will learn how to explore different career options, prepare for the job market, and develop job search strategies.

20.09.12 Career Development

This course will continue the exploration of career development, with a focus on more advanced topics such as job interviews, resume writing, and job negotiation. Students will also learn about the role of networking in career advancement.

20.09.13 Career Development

This course will introduce students to the basic concepts of career planning and decision making. Students will learn how to explore different career options, prepare for the job market, and develop job search strategies.

20.09.14 Career Development

This course will continue the exploration of career development, with a focus on more advanced topics such as job interviews, resume writing, and job negotiation. Students will also learn about the role of networking in career advancement.

20.09.15 Career Development

This course will introduce students to the basic concepts of career planning and decision making. Students will learn how to explore different career options, prepare for the job market, and develop job search strategies.

20.09.16 Career Development

This course will continue the exploration of career development, with a focus on more advanced topics such as job interviews, resume writing, and job negotiation. Students will also learn about the role of networking in career advancement.

20.09.17 Career Development

This course will introduce students to the basic concepts of career planning and decision making. Students will learn how to explore different career options, prepare for the job market, and develop job search strategies.

20.09.18 Career Development

This course will continue the exploration of career development, with a focus on more advanced topics such as job interviews, resume writing, and job negotiation. Students will also learn about the role of networking in career advancement.

20.09.19 Career Development

This course will introduce students to the basic concepts of career planning and decision making. Students will learn how to explore different career options, prepare for the job market, and develop job search strategies.

20.09.20 Career Development

This course will continue the exploration of career development, with a focus on more advanced topics such as job interviews, resume writing, and job negotiation. Students will also learn about the role of networking in career advancement.
