

## PROCLAMATION

### Rediscover Science Rendezvous Kingston Day

May 7, 2022

**Whereas** *Science Rendezvous Kingston* is back in town! *Science Rendezvous Kingston* is excited once again to bring Queen's researchers and STEM professionals/enthusiasts and community members together in-person to share in science-based fun; and

**Whereas** *Science Rendezvous Kingston* is also on the world wide web—with webinars and “on-demand” activities available to anyone, anywhere on the globe through the power of technology; and

**Whereas** *Science Rendezvous Kingston* highlights the leading-edge STEM research that is being done at Queen's, The Royal Military College of Canada and by citizen scientists in all domains; encouraging young students to see themselves as future researchers and scientists who are on a quest to discover solutions to problems that face our world; and

**Whereas** *Science Rendezvous Kingston* sparks student interest in STEM, provides opportunities to broaden and deepen students' engagement, reinforces scientific concepts and practices introduced during the school day, and promotes an appreciation for and interest in the pursuit of science in school and daily life;

**Therefore**, I, Mayor Bryan Paterson, on behalf of Kingston City Council, hereby proclaim May 7th, 2022 as “Science Rendezvous Kingston Day” in the City of Kingston.

**Dated** at Kingston this 23rd day of March, 2022.

Bryan Paterson  
Mayor
