

Life As Math

Music & Lyrics by: Freeyon Chung

Well, hello there! My name is Math
You may not notice, but we often cross paths

You interact with me every single day
Whether you're busy at work or busy at play

You use math to read a clock or watch
Or even when you're playing with blocks or hopscotch

Math also helps you tie shoes and make a stew
How many times you chew is really up to you

You don't get math? Well, I'm your man!
I'll try to teach you everything the best that I can

From fractions to data to pi
It can't be that hard, just give it a try!

Now, I can't be singing all the time
Here's what I'll do Bust a rhyme!

And now I'll teach you the math alphabet
Just know these words and you'll be set!

Addition
Bar Graphs
Circles
Degrees
Eight
Five
Googol
Hundred
Infinity
Justify
Kilo
Length
Metre
Number
Opposite
Patterns
Quarter

Rectangles

Squares

Triangles

Units

Volume

Weight

X -

Y - Coordinates

Zero is the last one of them all

Don't forget it even though it's so small

We're at the end of the song Wow! Time can really fly!

And now it's time for me to say goodbye

But don't worry 'Cause I'm everywhere!

In books, in food and even in the air

So again, it's Math here Saying bye for now

But I'm sure that we will meet again somehow

Get to know me 'cause that's the way to be

Just like knowing you're A to Z-ero
